

## CERAMIC TILE POLISH

### CERAMIC TILE POLISH

CERAMIC TILE POLISH is a one component two application product use to clean and polish ceramic tile. CERAMIC TILE POLISH will add a natural glossy shine to most unglazed ceramic, porcelain and quarry tile floors.

**DIRECTION FOR USE:** Ensure that the area to be polished is free of all topical coatings and soiling. Protect all surrounding surfaces with Tape & Drape. Select an area of approximately 25 sq ft for the polishing process. **Lightly** wet the floor with clean water and place 1 scoops (¼ cup) of **CERAMIC TILE POLISH** in the center of the area to be worked. Utilizing a red or hair pad, work the Ceramic Tile Polish over the area with a 175 to 300 RPM floor machine. The consistency of the slurry should be fluid enough to achieve even coverage. If the slurry becomes too dry, add water as needed. Work the product over the area for approximately 10 minutes. Rinse thoroughly with water and vacuum. Repeat process checking on the gloss desired. Rinse thoroughly with water and vacuum. Double rinse to remove all residue. Complete large areas in checkerboard fashion, overlapping sections to blend.

**NOTE;** Do not allow product to dry on surface.

**COVERAGE:** Approximately 250 sq ft per pound.

**FIRST AID:** EYES: Immediately flush eyes with plenty of water for at least 15 minutes. Seek medical attention immediately. INHALATION: Moved exposed person to fresh air. If irritation persists, seek medical attention immediately. INGESTION: Rinse mouth thoroughly. If the product is swallowed, do not induce vomiting. If victim is conscious, give plenty of water or sodium carbonate to drink. Seek medical attention immediately. SKIN: Remove contaminated clothing. Wash skin thoroughly with soap and water. Seek medical attention immediately.

**CAUTION:** Contains acid. Chemical product. Keep out of reach of children.

**PERSONAL PROTECTIVE EQUIPMENT:** Always wear appropriate personal protective clothing when using chemicals.
