Degreaser

DESCRIPTION: *Degreaser* is a water soluble, nonflammable concentrate that may be used on most surfaces in varying degrees of dilution. It is pleasantly scented and stainless. This cleaner dissolves and removes heavy accumulations of oil and grease such as heel marks, old wax and dirt and is especially effective in kitchens and restrooms.

DIRECTION: On countertops, cabinets and other washable surfaces, wipe on and rinse off. To remove heavy grease buildup such as exhaust fan grills, spray on full strength, agitate with a brush and rinse. Use 6 ounces per gallon for regular floor maintenance.
