H₂O SEAL

TRANSPARENT IMPREGNATOR FOR ALL STONE SURFACES

**WATER & OIL REPELLENT
SELF CURING
RESISTS STAINS
NON-YELLOWING**

H2O Seal is a transparent, impregnating, water and oil resistant treatment for use on all stone surfaces. Can be used on marble, granite, terrazzo, concrete and grout joints, as well as carpet and fabrics, for protection against stains. One application of H2O Sealer prior to grouting will make clean up much easier.

DIRECTIONS:

Apply to a clean, dry surface using cloth, or sponge mop. Allow to penetrate for 15 minutes, remove any pooling that has occurred. Apply a second coat. Remove any product that remains on the surface after 15 minutes. Coverage may vary from 80 to 800 sq. ft. per gallon coverage. For carpet and fabric protection, spray lightly and allow to dry. For use as pre grouting protection, apply 2 hours prior to grouting for easy clean up.

CAUTION: Avoid contact with skin and eyes, or breathing of vapors. For skin contact, wash with soap and water. For eye contact, flush with water for 15 minutes. If irritation persists, call physician.
