

HERTRON STONE SYSTEMS

Marble, Travertine, Limestone & Terrazzo

HERTRON INTERNATIONAL has developed several systems for the care of calcium base stone. To polish green marble or a stone low in calcium we recommend our Granite products.

THE PRIME GRIND SYSTEM

HERTRON'S PRIME GRIND SYSTEM is the oldest patented stone restoration system in this country. Developed over many years by John Thrower, this system is the only true stone restoration system available. PRIME GRIND performed properly will restore the stone to it's original beauty, with enhanced hardness and ease of maintenance. The 4 chemicals used in PRIME GRIND do not scavenge minerals from the stone to resurface but add vital minerals to restore and renew the stone surface. After spending so much time and money resurfacing your stone the longevity and ease of maintenance obtained from the PRIME GRIND products is money well spent.

PRIME GRIND 1: Hardening agent added during the resurfacing process.

PRIME GRIND 2: The primary polishing compound. This product is worked into the stone upon completion of the resurfacing process.

PRIME GRIND A :Part 1 of the two part final polishing process.

PRIME GRIND M: Part 2 of the final polishing process and maintenance procedure.

MARBLE SUPREME

MARBLE SUPREME POLISHING COMPOUND is a ready mixed polishing paste for polishing marble, travertine, limestone and terrazzo that has been diamond cut to 400 or 800.

MARBLE SUPREME POLISHING COMPOUND can be used to restore worn marble, travertine, limestone and terrazzo. It also helps to provide initial water/stain resistance.

MARBLE SUPREME POLISHING COMPOUND is easy to use. Requires very simple instructions to produce beautiful polished stone with great depth.

MARBLE SUPREME POLISHING COMPOUND produces a deeper, clearer finish with a natural hair pad, 15 to 20 percent faster than competitive products tested. HERTRON has used it's 50 years of know how, to ensure a longer lasting shine requiring less maintenance.

VITRE GEL

This series of products is used for removing scratches and traffic patterns from marble and terrazzo when diamond honing is not possible. VITRE GEL is a cost effective process for producing a beautiful polished floor.

On an extremely scratched floor, start with VG/80, followed by VG/220, VG/320, VG/500, then VG/POLISH. On a lightly worn floor, start with VG/500 followed by VG/POLISH. On a dull floor, start with VG/POLISH.

HERTRO SEAL is a transparent, impregnating water and oil resistant treatment for use on marble, terrazzo, ceramic tile and grout joints for protection against most stains. Can be used on granite.

ALPHA SEAL

Alpha Seal is a transparent, impregnating water and oil resistant treatment for use on marble, terrazzo, granite, ceramic tile and grout joints for protection against water, oil and stains. Increases slip resistance.

H2O SEAL

H2O seal is a water based transparent, impregnating water, oil and stain resisting sealer.
