

HERTRON STONE SYSTEMS

Rock Hard

Densifier for calcium based surfaces

ROCK HARD is a solution that provides sub-surface densification of calcium containing stone or cement based surfaces. ROCK HARD is economical, and safe to use.

ROCK HARD should not be diluted. ROCK HARD is ready to use.

Surface to be treated must be clean of all oil, grease, paint or other contaminants that would prevent penetration into surface. ROCK HARD is applied by sprayer with low pressure, it can be painted on or moped on. Full saturation is required for best results. It is recommended that 2 coats separated by at least 8 to 12 hours be applied to any surface.
