

Stone Solutions

Hertron is making stone restoration easy and goof proof. Hertron has developed a system for Marble, Travertine, Sandstone, Terrazzo, Verdi (Green Marble) and Granite. Our new systems produce beautiful results with out the worry of etching. Our system is easy to learn and does not require exotic equipment to perform the operation. The ease of use and the simplicity helps to improve the productivity of your labor, improving the bottom line.

MARBLE SUPREME

MARBLE SUPREME POLISHING COMPOUND is a ready mixed polishing paste for polishing marble, travertine, limestone and terrazzo, that has been diamond cut to 400 or 800 grit.

MARBLE SUPREME POLISHING COMPOUND can be used to restore worn marble, travertine, limestone and terrazzo, it also helps to provide initial water/stain resistance.

MARBLE SUPREME POLISHING COMPOUND is easy to use. Requires very simple instructions to produce beautifully polished stone with great depth.

MARBLE SUPREME POLISHING COMPOUND produces a deeper, clearer polish, 15 to 20 percent faster than competitive products tested. **HERTRON** has used it's 50 years of know how, to ensure a longer lasting shine requiring less maintenance.

GRANITE ONE STEP is a one component granite polish. It may be used to polish any color granite. It works with regular steel wool pads on a 175 to 300 RPM buffing machine. Hertron has simplified and reduced the cost with this process. **GRANITE ONE STEP** will bestow a deep brilliant shine on many slightly dulled granite surfaces. **GRANITE ONE STEP** is the polish that will remove diamond swirls from granite if the stone had to be diamond honed.

ULTIMATE BLACK will produce that extra depth and color that is wanted on black stone or high shine on other colors.

Hertron recommends that the choice of steel wool pad be taken into consideration when working on a granite floor. Hertron has found that using **ONE STEP** with a #3 or #2 for worn surface may help produce the desired results. For the final polish we recommend a #1 or #0 pad using the **ULTIMATE BLACK**.

HERTRON'S Granite products work very well on green and some black marble surfaces. On these stones the same procedures are used to restore these stones.
