BOCCI SEAL

Sealer for Marble, Slate, Flamed and Honed Granite & Terra Cotta Floors

DESCRIPTION: *Bocci-Seal* is an excellent water and oil repellent that is self-curing and non-yellowing treatment for use on hard porous surfaces for protection against most stains. *Bocci-Seal* is a color enhancer and provides a “wet look” on otherwise dull, hard surfaces.

DIRECTION: Apply only to a thoroughly clean floor.

Take care that all baseboards, carpet or other surrounding surfaces are properly taped and protected from overspray.

Using a lambs wool applicator or sponge mop, apply a very thin coat of *Bocci-Seal*, being careful that no excess liquid is left on the surface.

Allow to dry, then buff with a terrycloth bonnet.
